**SAFETY**

It is **PROHIBITED** to carry out an operation on a vehicle equipped with side air bags without first disconnecting the vehicle's battery.

This safety measure is to be applied for all operations requiring the following :

- removal of front seats fitted with a side air bag,

- operations relating to the repair or complete or partial replacement of any upper side structural section (for example, sill panel, centre pillar) and lower structural section (for example, floor panel).

**Following complete refit of the vehicle, it is ESSENTIAL to make sure that after connecting the battery, the AIR BAG warning light on the dashboard is extinguished.**

**If it is not extinguished, carry out a check using the XR 25 test box (refer to section 88 of the AIR BAG manual for the vehicle concerned).**

The repair methods given by the manufacturer in this document are based on the technical specifications current when it was prepared.

The methods may be modified as a result of changes by the manufacturer in the production of the various component units and accessories from which his vehicles are constructed".
