REPLACEMENT OF CENTRAL AIR VENT BLADES

- Engine: xxx
 - Gearbox: xxx
- Basic manual:**
Workshop Repair Manual **338**

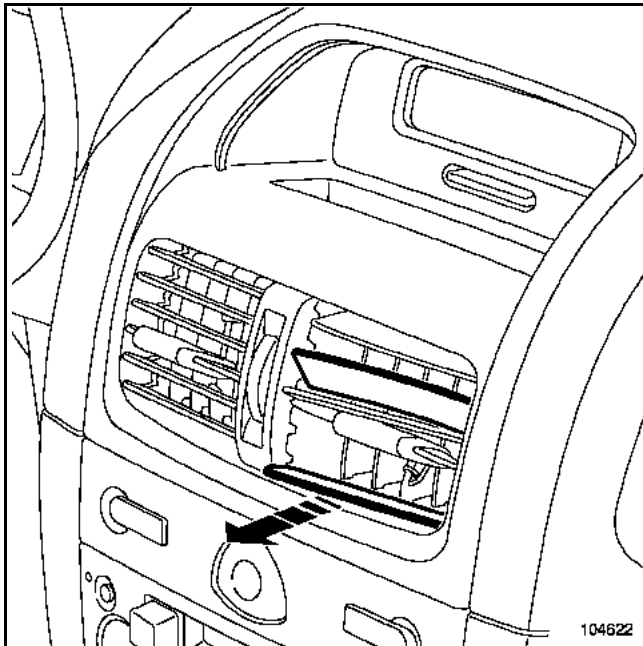

You will find in this technical note the instructions to replace the central vent outer blades of the dashboard.

Composition of the replacement parts.

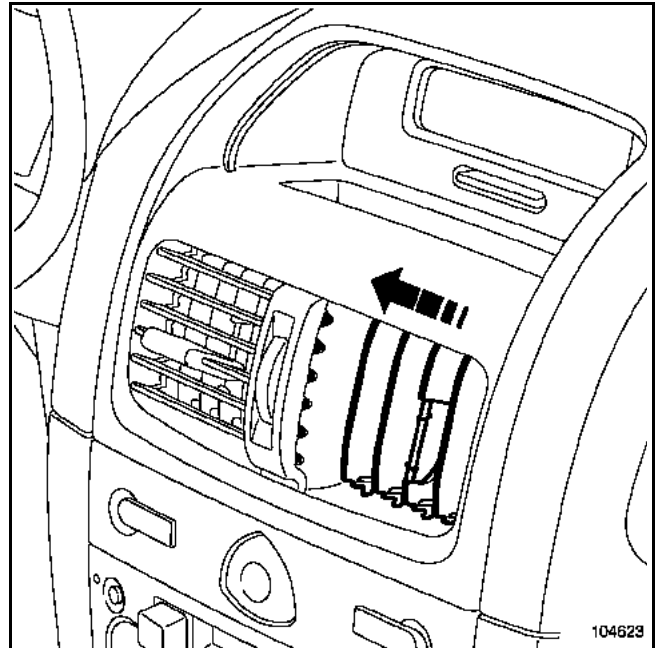

Left and right (1) assemblies (2) with setting tools.

REMOVAL

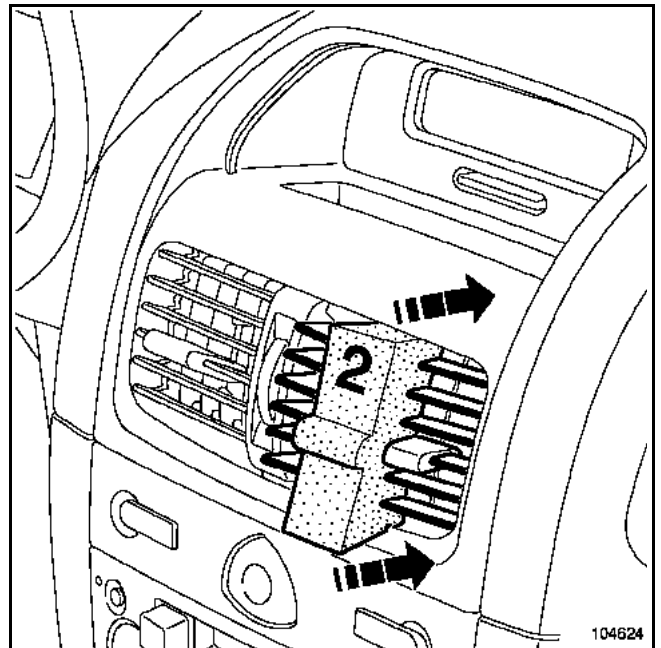

Unclip and/or remove the outer blade assembly.

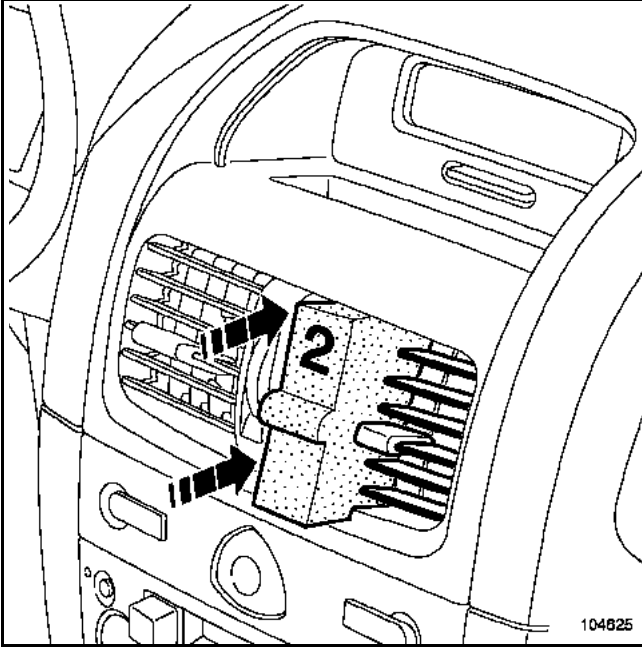

REFITTING

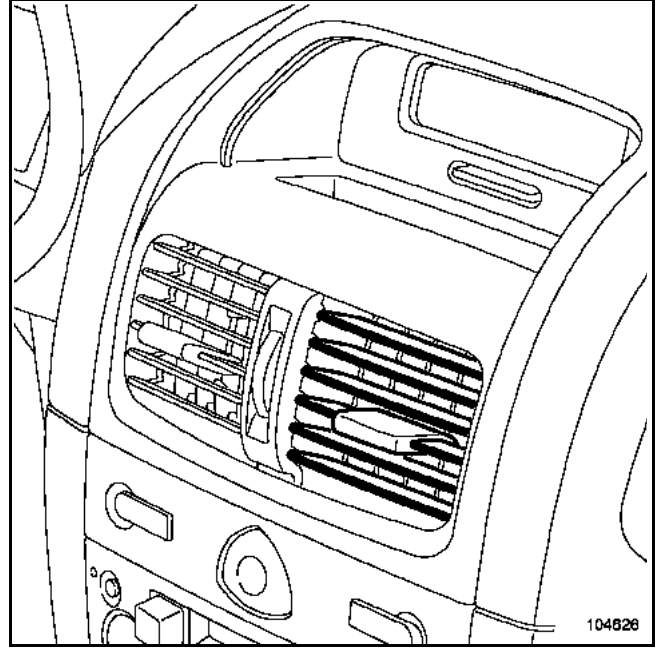

Place the inner blades towards the air inlet control wheel.

Place the blade caps in their housing on the opposite side of the air inlet command wheel.

Clip the blade caps in their housing on the opposite side of the air inlet command wheel.

Remove the setting tool.

Ensure that the vent blades are working correctly.
